MOBILIZATION PLAN

OFFICE OF RESEARCH AND REPORTS

(Prepared by ORR)

I. General

- A. Purpose. To set forth personnel and equipment requirements of ORR for carrying out its War Plans as set forth in Annexes B and C of the Global War Plan for the DD/I Area.
- B. Assumptions
1. The basic organization of ORR remains unchanged. 25X1B4d
 2. ORR will send [REDACTED] to theaters of command.
 3. ORR will send map collection teams to theaters of command.
 4. ORR will provide intelligence officers for integration into counterpart organizations of foreign intelligence agencies.

II. Personnel Mobilization Requirements

A. Total Requirements (See TABS A and B)

B. Field Requirements

25X1B4d

1. [REDACTED] will be established in each theater of command. Each group will consist of a control officer, a headquarters staff of 5, and 3 exploitation teams, each composed of 1 professional civilian and 4 trained civilian specialists. Mobilization requirements for these groups are based on two theaters of command.
2. A map collection team will be established in each theater of command. Each team will consist of 4 military officers, ranging from Major to 1st Lieutenant. Mobilization requirements for these teams are based on two theaters of command.
3. The provision of intelligence officers for integration into counterpart organizations of foreign intelligence agencies

will be accomplished by selecting a minimum number of intelligence officers from appropriate components of the Economic Research Area in accordance with specified need. This plan also calls for the assignment of 4 intelligence officers from the economic warfare support activity for integration into similar activities conducted [REDACTED] and/or other location.

25X1X7

25X1X7

C. Distribution of Requirements

1. The personnel mobilization goal of this plan presupposes continuing hostilities on a global scale over more than one year. TAB A provides the planned rate of build-up from D-Day.
2. In the initial period after D-Day, personnel strengths will be shifted within major components to accomplish priority tasks with primary consideration being given to competencies of individuals rather than to organizational staffing.
3. Although the personnel mobilization goal of this plan requires an over-all increase of 100 percent in the professional civilian personnel of the Office, percentage increases in excess of this figure are confined to four general activities, namely the EIC Secretariat, intelligence support to the economic warfare effort, [REDACTED] and photo intelligence. In the latter three areas of major planned expansion, the percentage increase is somewhat more than 300 percent in professional civilian personnel, but could not be effectively attained except over an extended period, in view of the requirements for training, clearance, and rapidly decreasing opportunities for recruitment.
4. A 42 percent increase in professional civilian personnel is included in the mobilization goal for the Geographic Research Area, excluding the photo intelligence activity, and a 68 percent increase is planned for the Economic Research Area.

25X1B4d

D. Schedule of Mobilization. The phasing of build-up toward the planned mobilization goal is provided in TAB A.

1. Call in key graduate reservists. (See TAB C)
2. Convert military reservists from civilian to military status in implementation of the DD/I conversion plan. (See TAB D)

TOP SECRET

3. Request assignment of military officers to ORN in accordance with plan.
4. Initial phased calling in of other graduate reservists.
5. Initiate phased recruitment of potential civilian reservists. (See TAB B)
6. Continue phased recruitment as required.

III. Space Requirements

- A. Pending availability of additional space following D-Day, personnel increases resulting from mobilization will be handled in the first instance by substantial reduction in the floor space per person, followed by the institution of two shifts in those components which experience the most rapid build-up and can most easily adjust to a two-shift operation.
- B. As additional space becomes available, the space requirements will be planned in accordance with the rate of personnel mobilization within individual components and on the basis of square footage requirements per person as presently established for specific activities of the Office.

IV. Equipment Requirements

- A. As space permits, and in accordance with the rate of personnel mobilization, equipment requirements will be the same per person as presently established for specific activities of the Office.
